

COLLECTION OF MAKING CEILING LUMINARIES DESIGN HAVE MORE POSSIBILITIES.

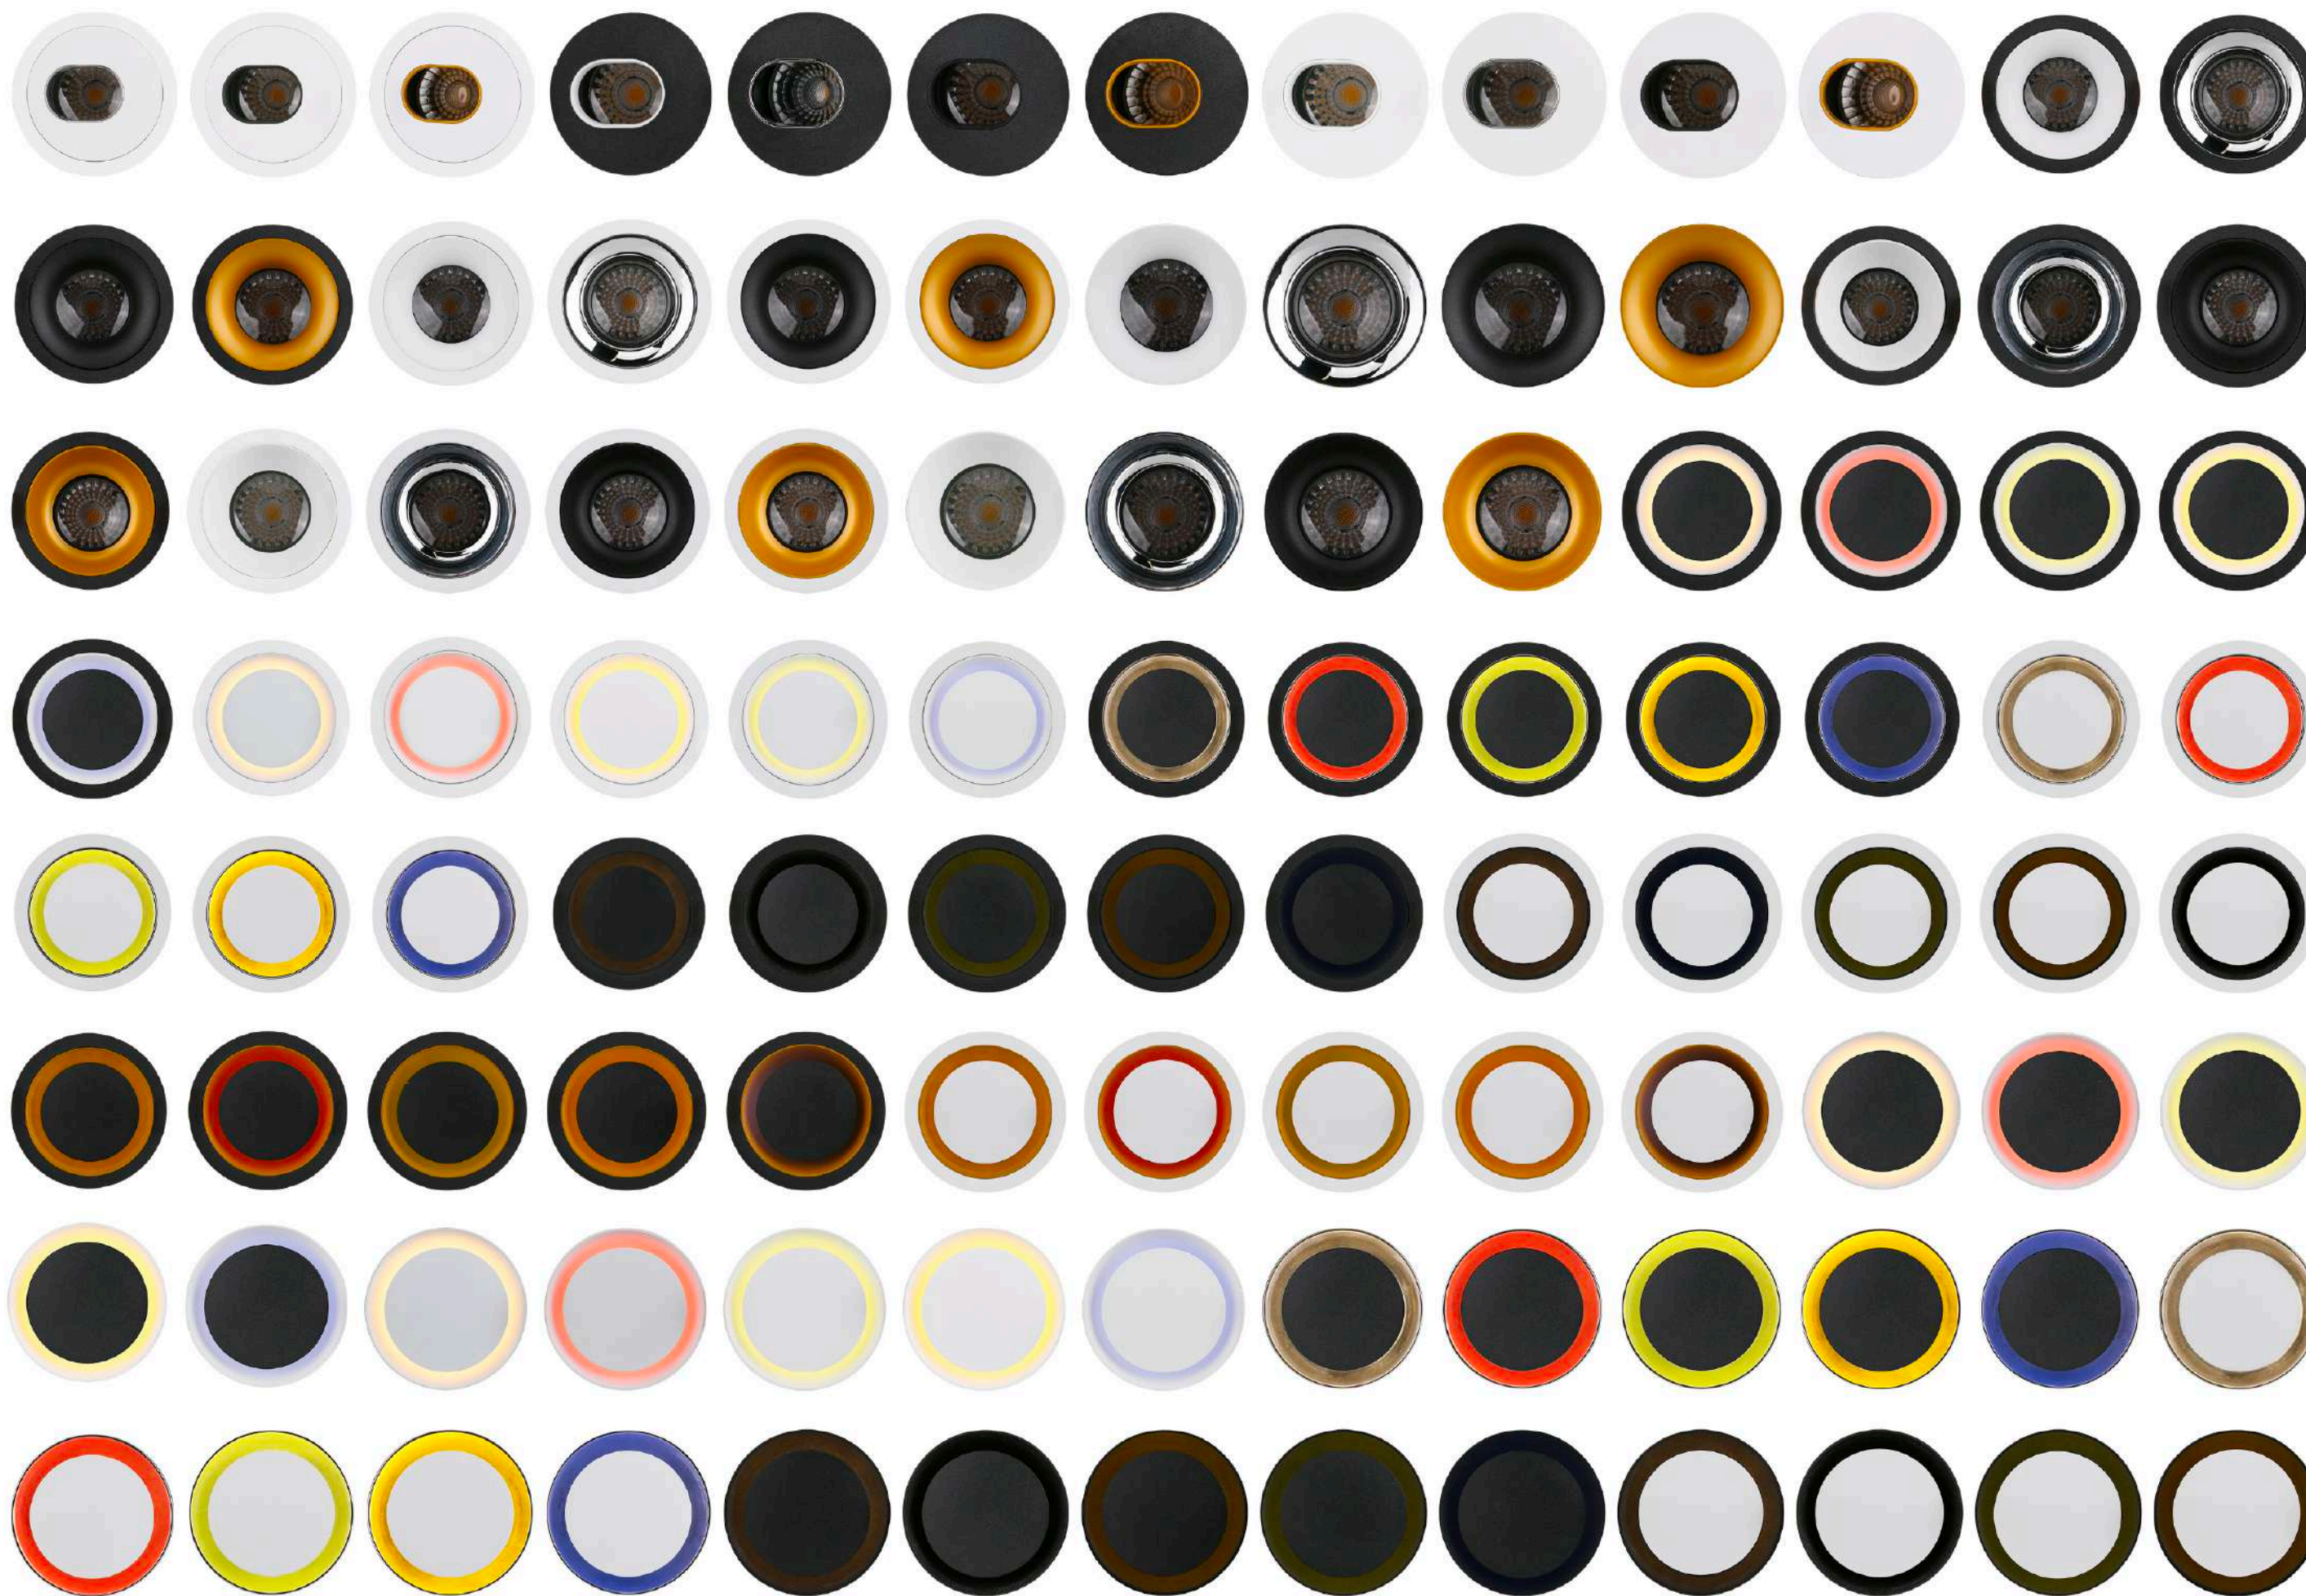

Thanks to precise&flexible mechanical
connection design, a variety of functional
optics and finest finish process,
can achieve the effect that can be perfectly
integrated in many applications.

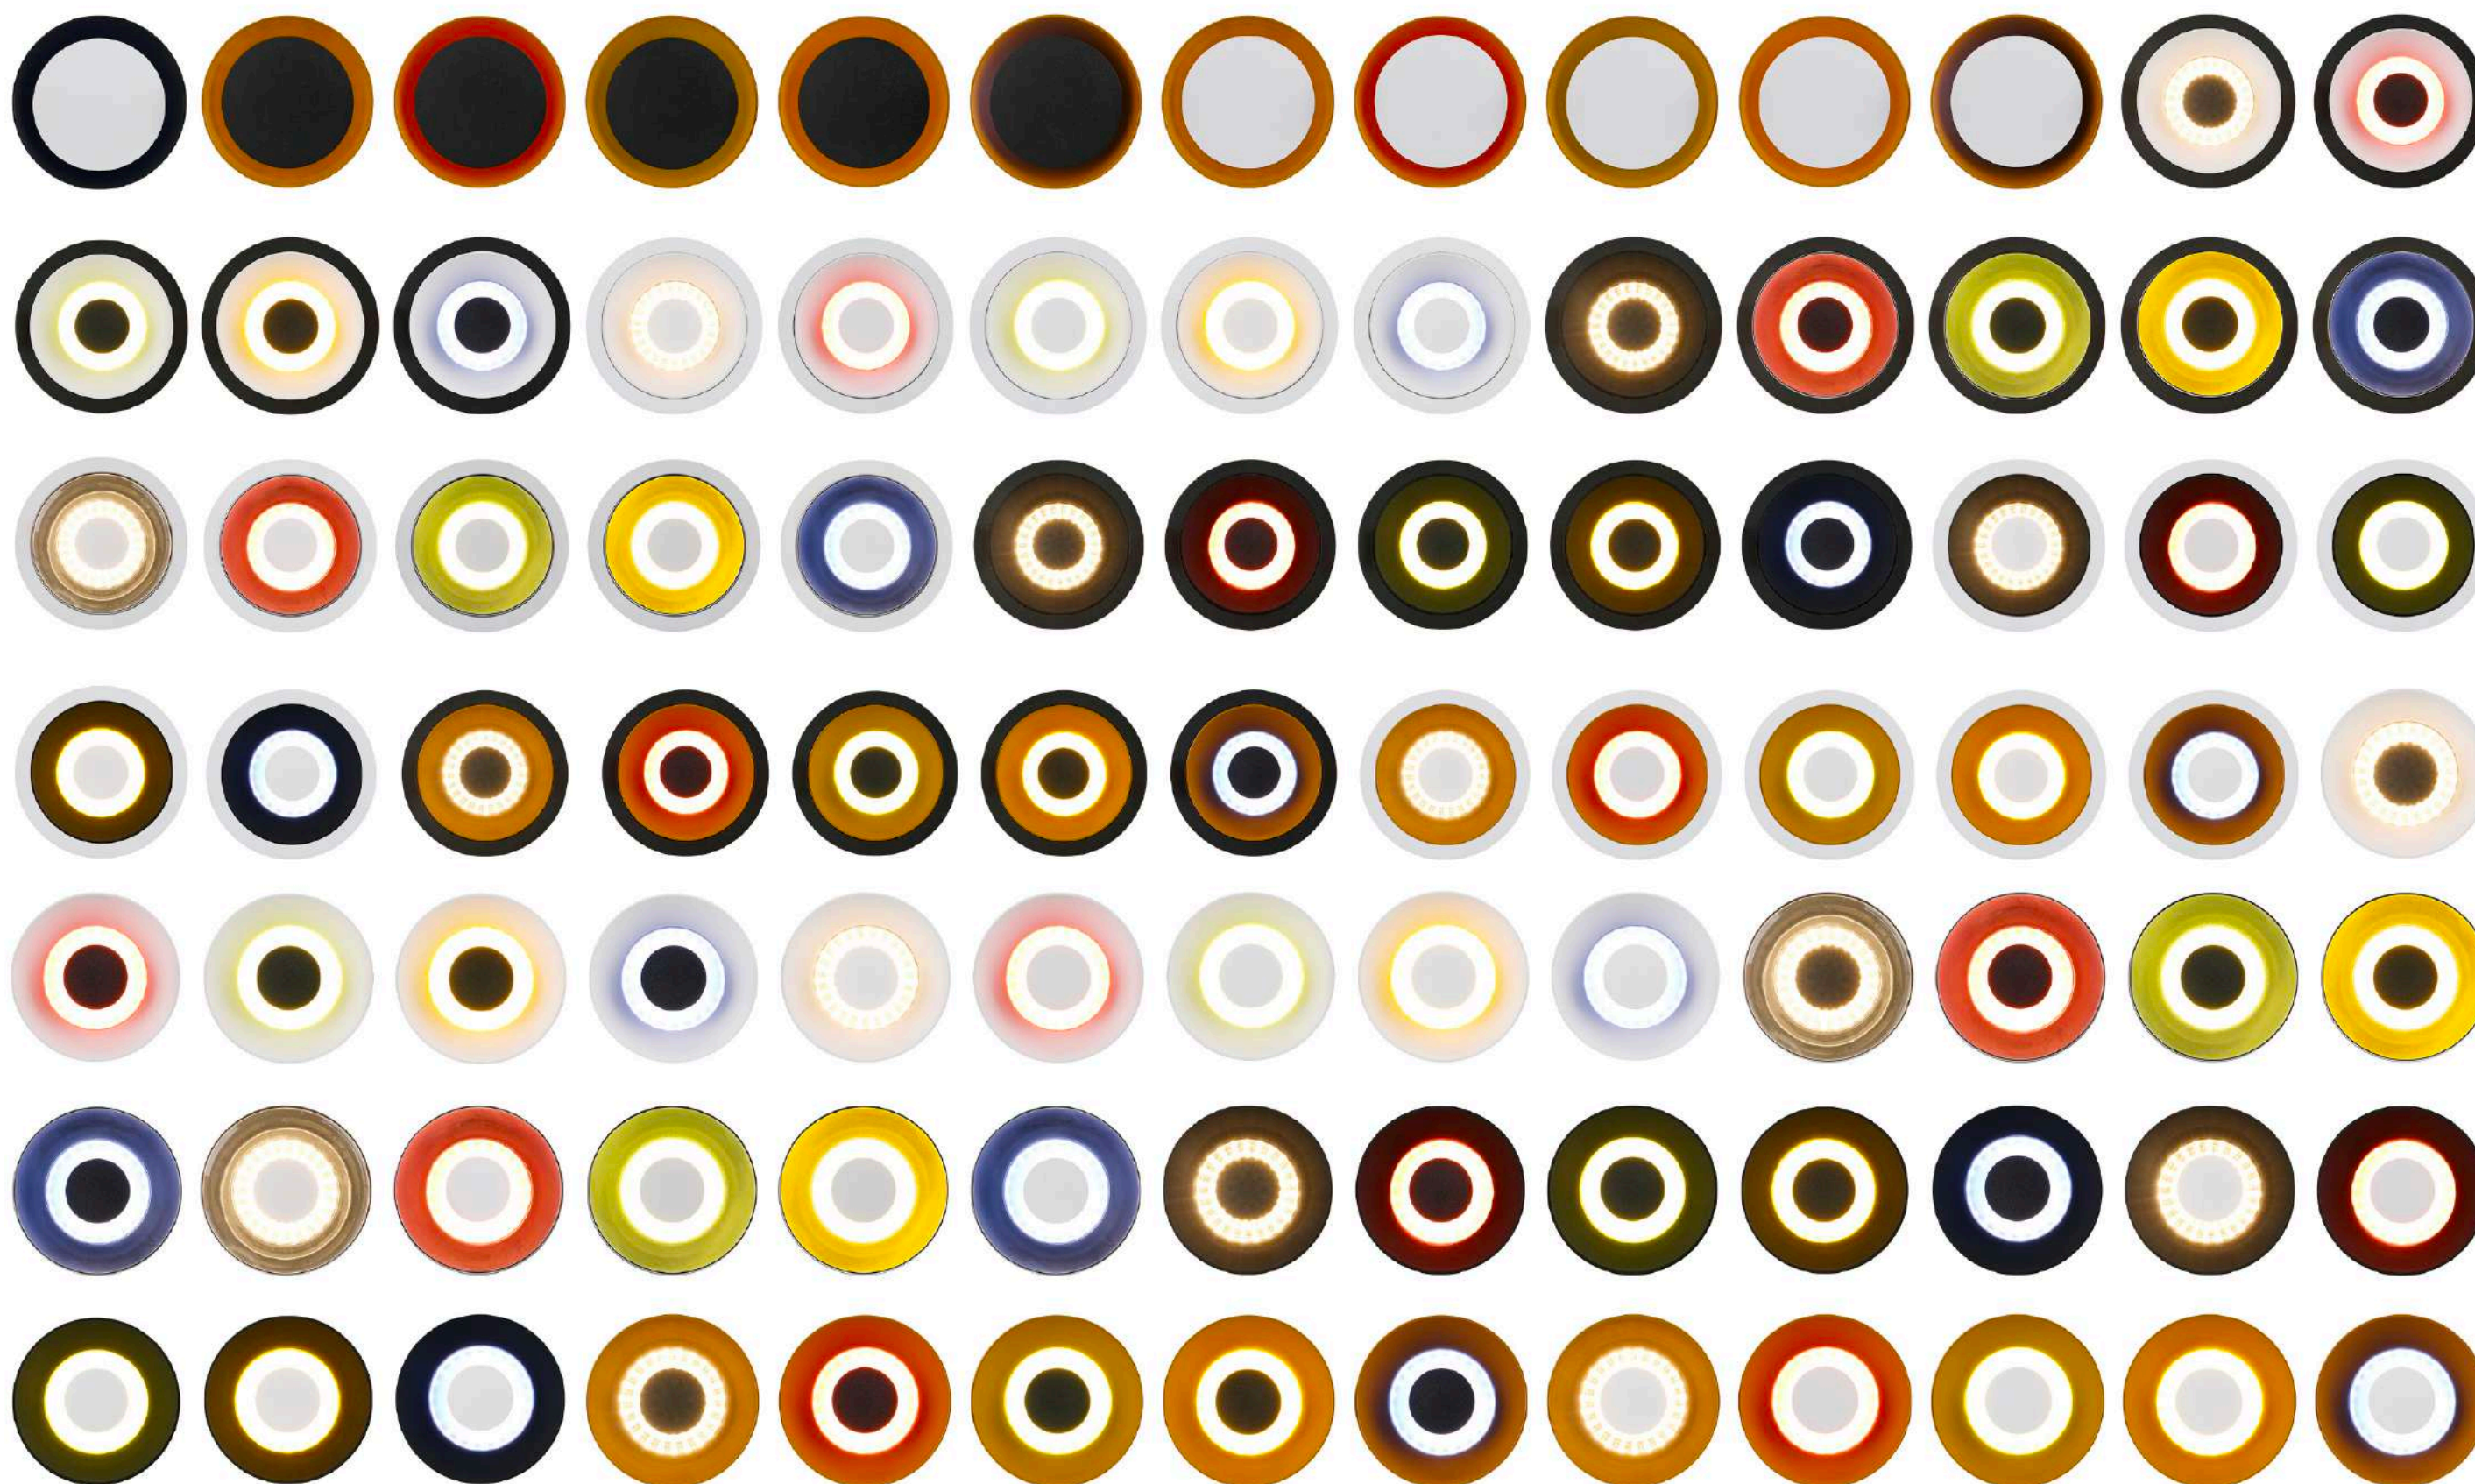

A vertical line with five dots serves as a central axis for the table of contents. To the left of the line, the page numbers are listed. To the right, the chapter numbers (01-05) are listed in large red font, followed by the chapter titles. The layout is as follows:

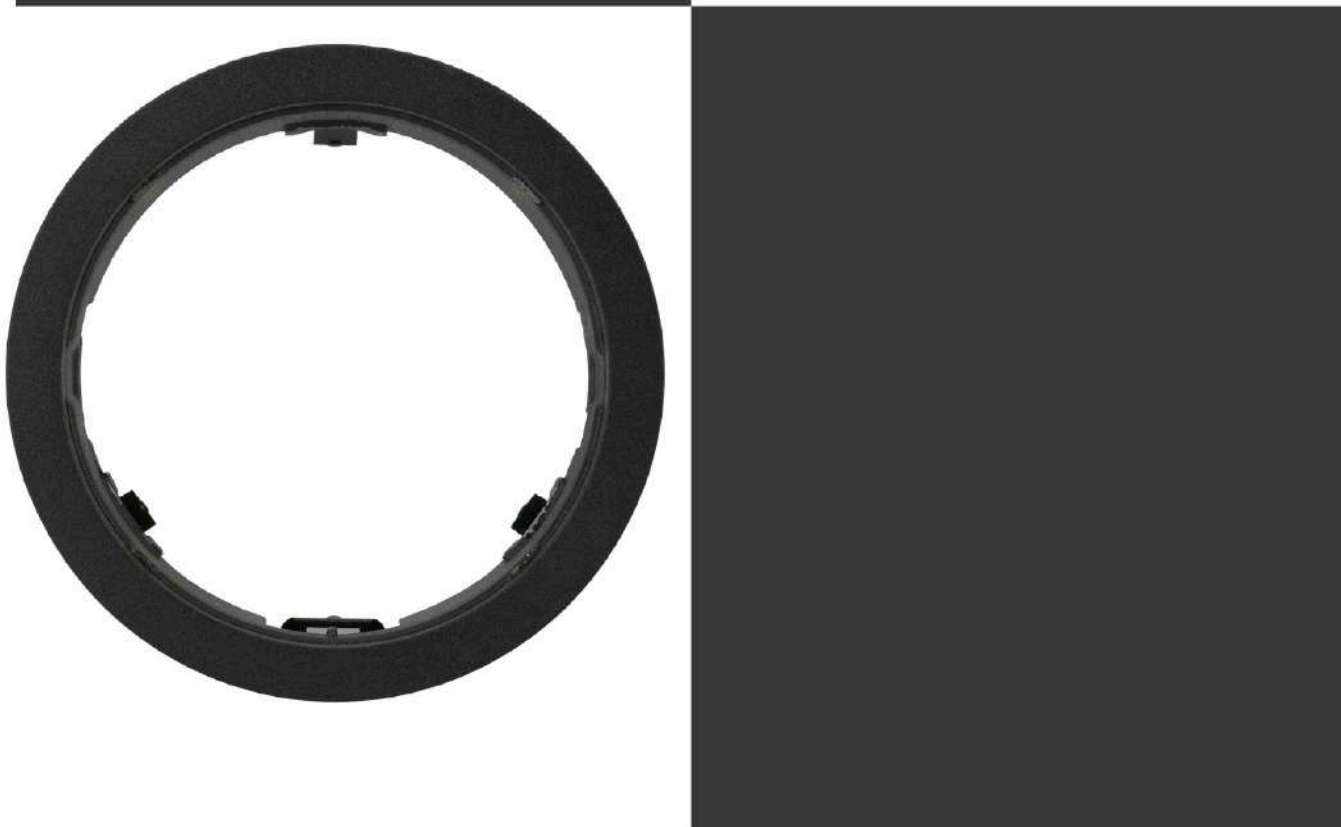

4-11	Overview	01	
		02	Mechanical 12-19
20-21	Optics	03	
		04	Application 22-26
27-30	Parameter	05	

① Corrosion-resistant AkzoNobel Powder Finish

Installation.

Plasterboard Installation

Concrete Installation

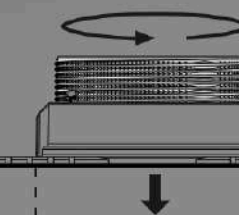

Trimless Installation

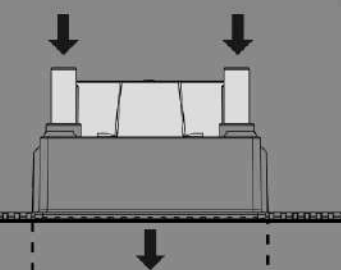

①

②

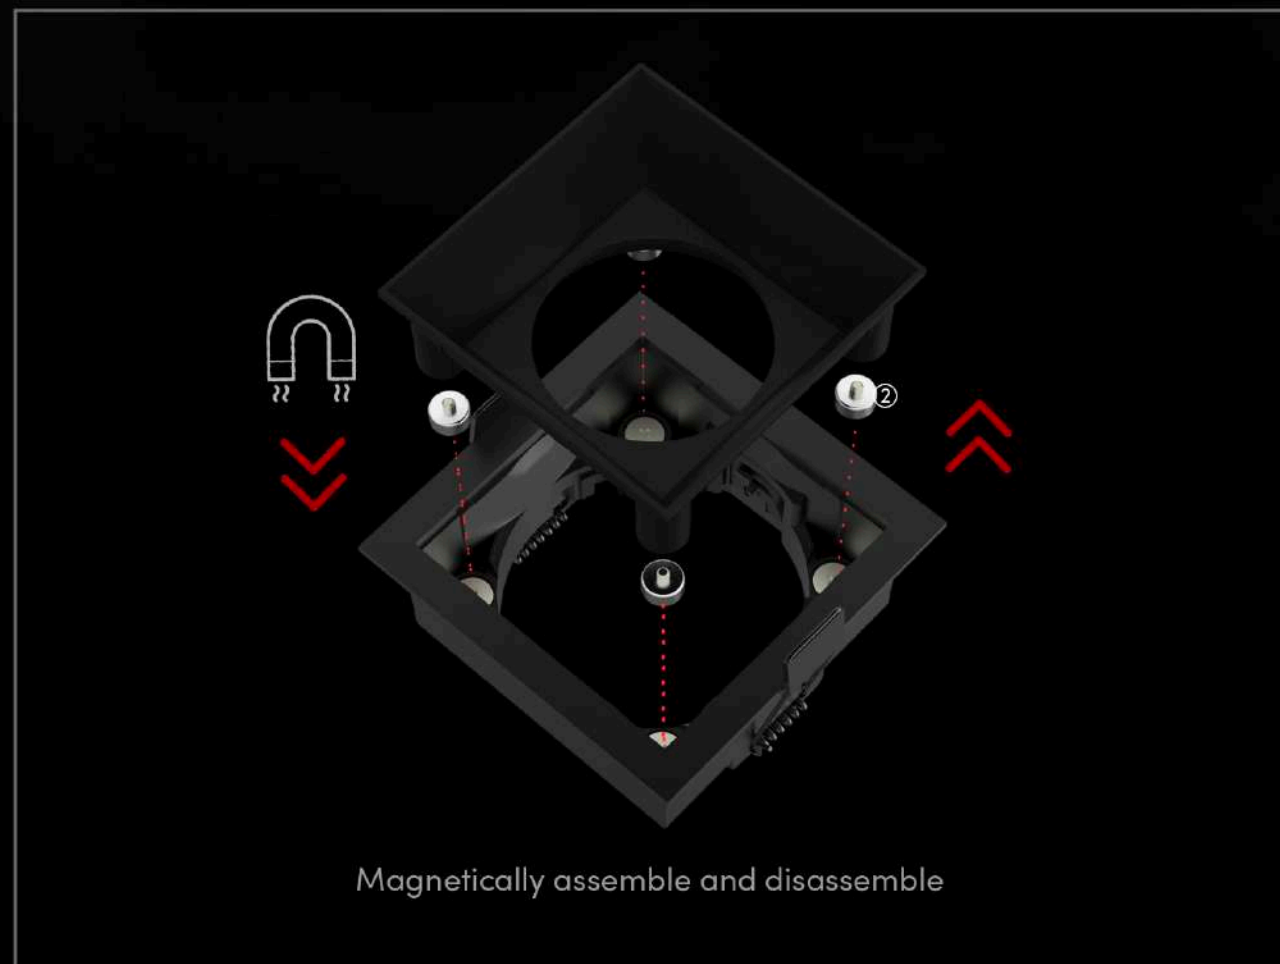

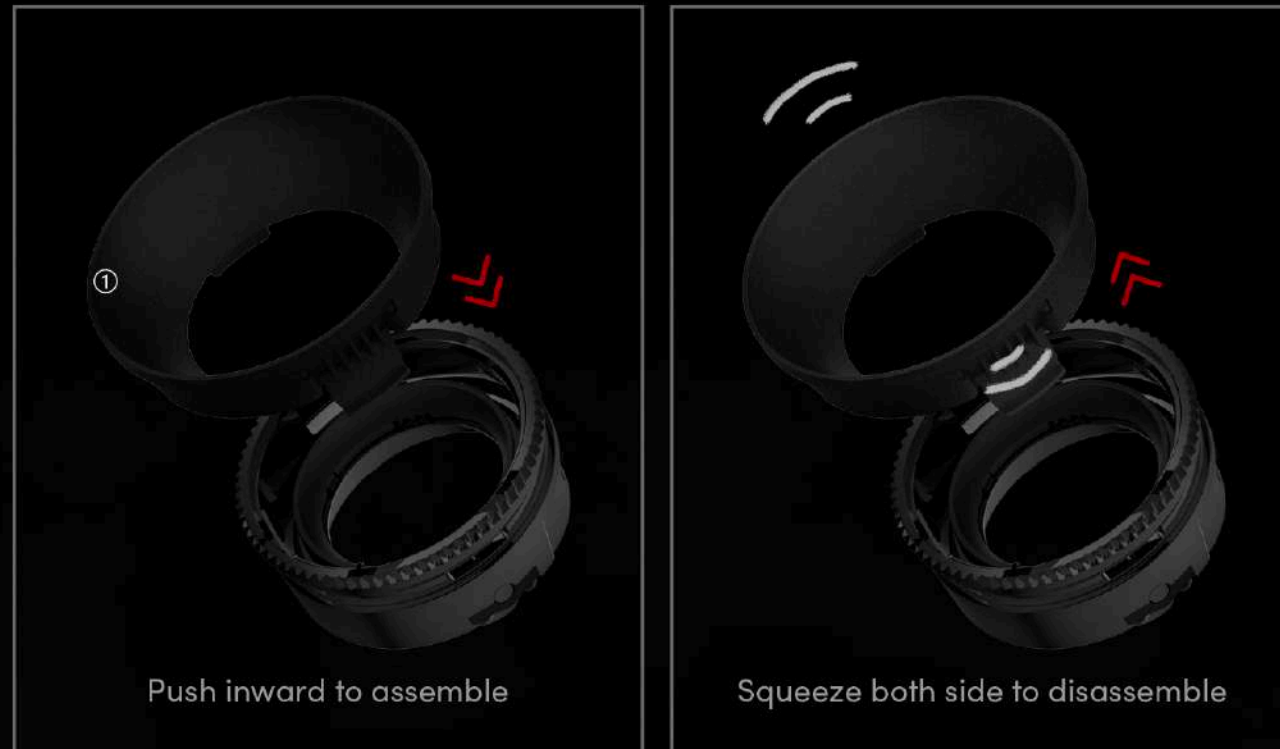

③

It can be installed in the ceiling or beneath the ceiling, also can fit ceiling with thickness of 0~25mm by adjusting the side bracket.

Toolless for Flexibility

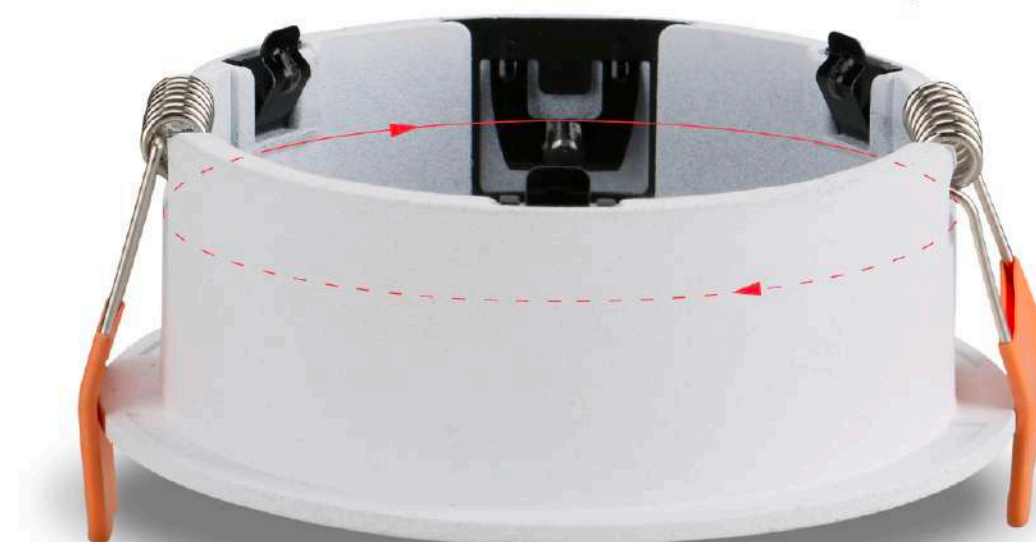

It's for flexibly changing reflector and surface mounted/pendant parts

CLICKLOCK

Clicklock setting can fix the lamp in the fixture. It can prevent the lamp from loosening.

TICKLOCK™

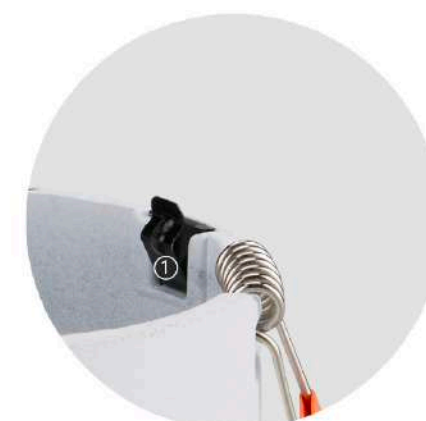

The precise tilt angle can be confirmed through the comfortable clock-ticking sound. It's called Ticklock™ technology.

NOCK

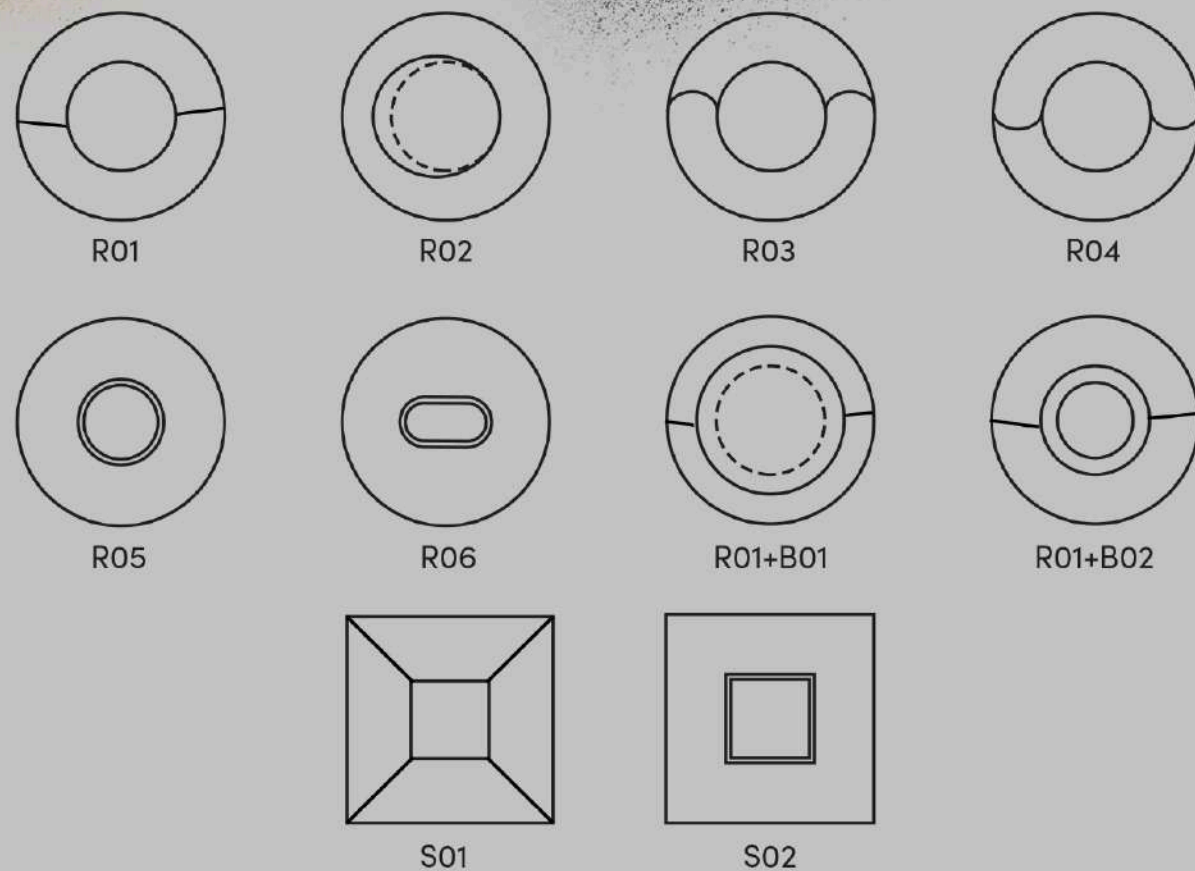

Nock setting can create comfortable gear noise and friction when the inner ring is rotating.

① Stainless spring

Multiple Anti-glare Reflectors

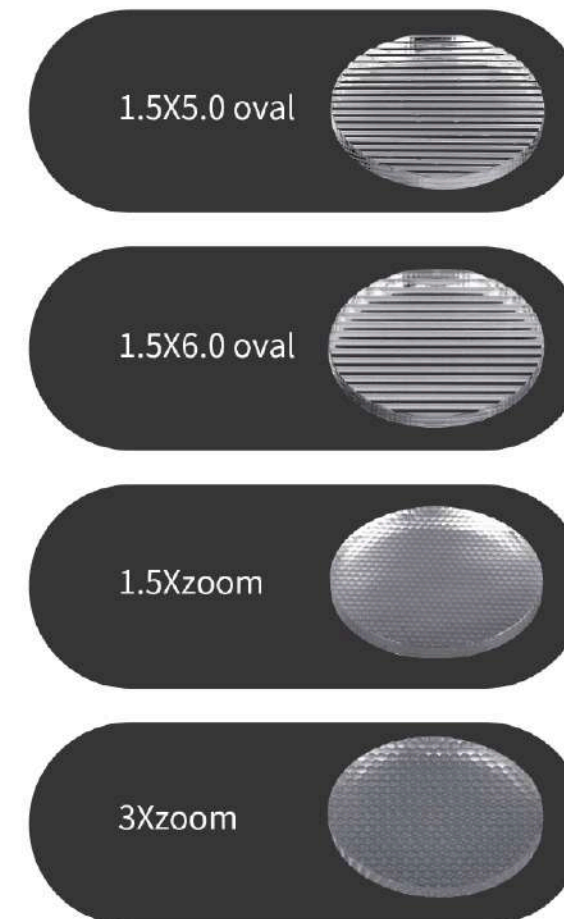

The project needs can be easily satisfied as these reflectors are a combination of classic, feasibility and innovation. In addition, finish with painting and electroplate make them more stunning.

Multifunctional Accessories

One more tiny piece sometimes makes a big impact in no doubt.

- 4 X lens filter to control the beam better.

- 2 X waterproof glasses to resist moisture.

- 1 X honeycomb to update your visual comfort further.

- 5 X color filter to enrich the design elements.
